Salado, O. May. 14. 80

Dr. Engelman

Dear Sir.

I am interested in the Cactaceae (what I am specially trying to get at is their plan of branching and the presence of their true leaves) and want works relating to them. Will you name me some such publications? I am more particularly interested in the genus *Opuntia*. I have a fine specimen of *Op. cochinchinensis* Will. (?) and from observing its growth I became interested in it. I would like the name of such works as have been published upon the Cactaceae either by the government or private individuals. Have you seen the monograph issued in London a few years ago and if so is it a desirable work?

Please let me hear from you
as early as your convenience
will permit as I expect to
go to Columbus June 5th and
~~in~~ ^{as} the quin bureau of the late John
Ripport has some 100 or more rep-
resentatives of the Cactaceae I
want to take some notes on them
with me when I go if I can
get there as soon as that.

Yours

farewellly Yours
J. A. Sanford

Dr. H. Engelman

Dear Sir, your valued favor 15th
just duly to hand.

H. Allnut, "The Cactus and other Tropical
Succulents, 12 nos. cloth. 1848. ^{" Second hand} 33 6d is
the work referred to in my letter, from the
low price of the work it is probably a
small work I saw it offered in a London
list and will send for it soon when I
will report about it if I succeed in
getting a copy. I have your report on
P. R. R. Cactaceae Vol. 1 V and expect soon
to get Mex. B. survey. I do not expect
to do much with the Cactaceae as they
are rather inaccessible and my time such
as I can devote to botany is mostly
spent on the Salicaceae and Gramineae.

Faithfully yours,

J. A. Sanford
